Tricolite flow in FactWise for Integrated Quoting & Procurement flow

Tricolite flow in FactWise for Sourcing

How can FactWise help with more conversions

Ensure best price for Class A and B items by creating rapid RfQs in FactWise before final quote is sent

Reduce errors by auto-calculating fully landed cost for the quote (including item prices)

Make informed decisions on quotations using distinctive analytics

Significant automation to increase speed of pricing quotation

Get accurate estimates during quotation for Class C items

How can FactWise help decrease procurement costs

Provide **complete project level and BOM level (Costing vs Design BOM) tracking** for all items

Ensure cheapest price for all items by auto-filling the price across all quotes, events, and contracts for that item

Reduce costs of procuring Class A and Class B items by structured negotiations with distinctive analytics

Reduce over-ordering of all items, especially Class C items, by enabling end to end tracking

Biggest concerns for making FactWise successful

- 1 Buy in from Engineering team to change current operating behaviour
- 2 Rigidity in following certain current processes and desire to match current solution
- 3 Unnecessary integrations with SAP that lead to longer lead time and slower systems

Thank you!
